

PLUG-AND-PLAY DRY CONTACT RELAY CARD FOR UPS LOCAL MANAGEMENT

The relay I/O card allowing users to communicate UPS status and events to perform local management

Ideal for UPS systems, the Onsite Management Card Series is an add-on component for UPS expansion port, providing local management solution for UPS systems to easily monitor and control UPS status. The cards support plug-and-play for compatible UPS. The relay I/O cards feature a dry contact interface, which is able to provide ON/OFF control of connected devices, such as triggering emergency alarms, exit lights, generators, and more.

COMPATIBLE UPS
